SUMMARY

Software Engineer with nearly 3 years of experience developing and delivering online marketplace platforms for diverse business models. Strong focus on scalability, reliability, and long-term maintainability in fast-paced product teams.

CORE SKILLS

Languages	TypeScript, JavaScript, Python, SQL, HTML5, CSS3
Web Development	React.js, Redux.js, Node.js, Express.js, REST APIs, Stripe, Sharetribe
Data & Messaging	PostgreSQL/pgvector, DynamoDB, RabbitMQ, AWS SQS
AI	OpenAI API
Cloud & DevOps	AWS (Lambda, EC2, S3, CloudFront), Docker, CI/CD
Tools	Git, Sentry, Claude, Trello

PROFESSIONAL EXPERIENCE

JOURNEYHORIZON Mar 2024 – Present

Associate Software Engineer

- Contributed to the development and delivery of more than 10 marketplace platforms built on Sharetribe, supporting different business models and requirements.
- Developed responsive frontend interfaces with React and Redux, including booking, onboarding.
- Built backend APIs and business workflows using Node.js/Express, integrating payments, databases, and AWS services.
- Supported business analysts in gathering and clarifying requirements, and assisted clients with product inquiries and issue resolution.

PROJECTS

Localmingo – A marketplace connecting travelers with local guides and unique travel experiences

Tech stacks: *Node.js/Express, Stripe API, AWS Lambda, DynamoDB, OpenAI APIs, react-intl*

- **Off-session payments:** Saved customer cards at checkout using Stripe SetupIntent and automatically charged them through off-session PaymentIntent upon booking confirmation. Built a post-payment Lambda workflow to transfer funds to provider Stripe Connect accounts, with DynamoDB TTL-triggered payout retries when sufficient balance becomes available.
- **Multi-currency support:** Built a scheduled AWS Lambda to fetch exchange rates for supported currencies and cache them in DynamoDB, using async-retry for retry handling. Enabled consistent price conversion and display across frontend and backend in the user-selected currency using Decimal.js.
- **Multilingual support:** Organized UI translations into per-module JSON files and automated translation of missing keys with an AI script. Implemented browser-language detection and locale persistence using React Context and cookies. Added dynamic AI translation for user-generated content, including listing titles/descriptions, profiles, and reviews, with translation triggered when hosts create or edit listings.

GearShare – An AI-powered B2B marketplace for renting professional live-event equipment

Tech stacks: *TypeScript/Express, OpenAI API, PostgreSQL/pgvector, Sharetribe API, RabbitMQ, AWS SQS/EC2*

- **AI-powered semantic search:** Built a natural-language search pipeline integrating OpenAI to generate and query vector embeddings, improving equipment discovery by matching search intent rather than relying solely on keywords.
- **Event-driven async processing:** Designed asynchronous event processing with RabbitMQ to fan out events to independent consumers with automatic retries. Integrated AWS SQS for communication with on-demand workers to support reliable processing as event volumes grow.
- **Bidirectional inventory sync (GearSync):** Developed two-way inventory synchronization with self-managed API key authentication and batch processing that handles partial failures. Automated EC2 instance provisioning and termination on demand to process large datasets while optimizing operating costs.

EDUCATION

VNUHCM – UNIVERSITY OF SCIENCE Ho Chi Minh City

Master of Artificial Intelligence – Current average: 9.07/10 *Dec 2025 – Present*

VNUHCM – UNIVERSITY OF SCIENCE Ho Chi Minh City

Bachelor's Degree in Information Technology – Grade: 8.90/10 *Sep 2020 – Sep 2024*

Relevant coursework: Software Requirements, Software Design, Software Testing, and Web Application Development.

CERTIFICATIONS & LANGUAGES

Certifications	AWS Certified Developer – Associate, Amazon Web Services (Issued Jul 2025)
English	TOEIC Listening & Reading: 860 (Jul 2025); Speaking & Writing: 290 (Sep 2023)
